

Now with the option of Activated Carbon!

SAFEGUARD Window Filter™ with Activated Carbon

Screen baffles increase filter efficiency, and in inclement weather help keep out rain and snow.**

Manufactured Sizes Fit Most Double-Hung Windows

Style	Height	Adjusts
AC736	7"	20" - 36"
AC744	7"	24" - 44"
AC1136	11"	20" - 36"
AC1144	11"	24" - 44"

A necessity for any allergy sufferer! This advanced health device is a great way to get fresh, filtered air into your home or office. Adding activated carbon to our filter media allows the filter to capture odors and gases in addition to the excellent particulate filtering capacity of the original. All from a device that is simple to use and does not use electricity.

The **SAFEGUARD Window Filter with Active Carbon** is easy to use. Simply open your double-hung window, expand the filter to fit and close the window down on top. That's it! The **SAFEGUARD Window Filter with Active Carbon** is symmetrical, so either side can be positioned facing out.

Affordably priced, the **SAFEGUARD Window Filter with Active Carbon** uses a sturdy aluminum frame, molded end-caps, vinyl seals and a poly-fiber filter. White edges complement most room decors.

In the battle against outdoor allergens, the **SAFEGUARD Window Filter with Active Carbon** is a cost effective, practical way to get fresh filtered air into your home.

The **SAFEGUARD Window Filter with Activated Carbon** is NOT a Window Guard.

The United States Consumer Product Safety Commission has recommended several steps to help prevent injury:

- Do not depend on filters or screens to keep children from falling out of windows
- Whenever possible open windows from the top – not the bottom
- Keep furniture away from windows to discourage children from climbing near windows

NEW
